Data Engineering Lead at Datawalt. Built and lead a team of 5 and designed **Warp**, a data integration platform serving over 500 companies and processing 1.6 TB daily. I combine data architecture, business analytics and agentic systems to turn client needs into production solutions, with a focus on scalability, reliability and data contracts.

EXPERIENCE

Data Engineering Lead · [Datawalt](#) Oct 2024 — Present

- Designed and lead **Warp**: 150 enterprise integrations (SAP B1, HANA, Softland, Odoo) replacing Fivetran and centralizing data in BigQuery and ClickHouse through real-time and batch pipelines.
- Built Datawalt's first data engineering team, now 5 people, focused on scalability, reliability and connector development.
- Designed idempotent loads, staging swaps and safe backfills, with pipeline health and data freshness monitoring.
- Developed bidirectional connectors for SAP, QAD and Dynamics 365; maintain per-client isolation on GCP and deployments through GitHub Actions with self-hosted runners.
- Stack: Python · Go · SQL · Dagster · dbt · dlt · BigQuery · ClickHouse · DuckDB · GCP · Docker.

BI Developer · [Datawalt](#) 2023 — Oct 2024

- Built dozens of star schemas integrating HR, CRM, ERP and sell-out data, and Power BI semantic models for finance, mining and operations clients (Bagó, Enaex, Janssen, Canontex).
- Created parameterized Power BI / DAX templates for SAP B1 financial reporting and a unified HR model (Talana, GeoVictoria, Buk), reusable across clients.
- Optimized BigQuery costs using INFORMATION_SCHEMA and materialized staging tables.

AI & AGENT SYSTEMS

- Multi-agent orchestration** — Designed and operate self-hosted agents (DeepSeek + Claude), coordinated through a shared relay with per-agent identity and least-privilege access. *Nostr · ACP · Docker.*
- MCP & tools** — Built MCP servers for multiple business functions, connecting agents to internal data and tools. *TypeScript · MCP.*
- Agent Skills & FOSS** — Author of **ecl-skill** for production pipelines; contributor to **netresearch/retro-skill** (opcode adapter). *Claude Code · Python.*
- Controls & observability** — Maintain rules, skills and MCP context for coding agents; automate deployments with CI/CD checks, pipeline monitoring and SLA alerts.

SELECTED PROJECTS

- Warp** — Architecture and development of Datawalt's integration platform: extracting, normalizing and publishing enterprise data for analytics. *Python · Go · BigQuery · ClickHouse.*
- SAP Business One Integration** — SAP B1 / HANA data extraction, star-schema modeling and reusable financial reporting templates for clients. *SQL · BigQuery · Power BI · DAX.*

SKILLS

Warehouses	BigQuery · ClickHouse · DuckDB · Snowflake · SAP HANA · Apache Iceberg · Delta
Orchestration	Dagster · Prefect · dbt · dlt · DolphinScheduler · Kafka
Languages	Python · Go · SQL · TypeScript · Node.js
Infra	GCP · Docker · GitHub Actions · CI/CD · Linux · Tailscale
AI / Agents	Claude Code · Agent Skills · MCP · Multi-agent orchestration · LLMops/observability
BI	Power BI · DAX · Deneb (Vega) · Plotly · D3.js
Spoken languages	Spanish: native · English: expert proficiency

EDUCATION

Data Science Diploma & Music Composition B.A., PUC Chile
