

Alonso Burón

Lead Data & AI Engineer · Agent Systems · Client-Facing

Santiago, Chile · alonso.buron@proton.me · alonsoburon.cl · [linkedin/alonsoburon](https://linkedin.com/in/alonsoburon) · [github/alonsoburon](https://github.com/alonsoburon)

Lead Data & AI Engineer at Datawalt (Santiago, Chile), where I architect and run **Warp**, an ETLT platform consolidating 150 enterprise systems (SAP B1, HANA, Softland, Odoo) into BigQuery and ClickHouse. I focus on what stays hard now that AI writes pipeline code — idempotency, backfill safety, data contracts and trust — and I design **agentic systems** — MCP servers, Claude/Agent Skills, cost-tiered multi-agent orchestration and agent-harness tooling. I own client-facing delivery from discovery to production and lead a team building production data infrastructure across Chile.

EXPERIENCE

Data Engineering Lead · Datawalt

Oct 2024 — Present

- Architect and own **Warp**, an in-house ETLT platform replacing Fivetran for 150 enterprise sources (SAP B1, HANA, Softland, Odoo), moving 160,000 tables daily into BigQuery and ClickHouse.
- Lead a small data engineering team; promoted for reframing scope from delivery to platform scalability.
- Designed the pipeline reliability patterns behind **Warp**: idempotent loads, staging swap, health tables, tiered freshness and backfill safety.
- Built parametrized Power BI / DAX reporting templates and unified HR star-schema (Talana, GeoVictoria, Buk) for multi-client deployment.
- Stack: Python · Go · SQL · Dagster · dbt · dlt · BigQuery · ClickHouse · DuckDB · GCP · Docker.

Data Engineer · Datawalt

2023 — Oct 2024

- Delivered enterprise ELT pipelines and Power BI semantic models for finance, sales and operations clients (Bag, Enaex, Janssen, Canontex); owned SAP B1 / HANA extraction and star-schema modeling.

AI & AGENT SYSTEMS

- **Multi-agent orchestration** — Self-hosted, cost-tiered agents (DeepSeek + Claude) behind a shared relay with per-agent identity and least-privilege access. *Nostr · ACP · Docker.*
- **MCP & tool use** — Shipped an MCP server and open API for point-in-time macro data, so agents query series safely without look-ahead bias. *TypeScript · MCP · Vercel.*
- **Agent Skills & FOSS** — Author of an open-source Agent Skill for production pipeline patterns (**ecl-skill**); contributor to **netresearch/retro-skill** (opencode adapter). *Claude Code · Python.*
- **Harness, gates & observability** — Maintain CLAUDE.md rules, skills and MCP context for coding agents; ship through gate-enforced CI/CD; run pipeline health tables and SLA alerting. *Claude Code · CI/CD.*

SELECTED PROJECTS

- **vintage** — Point-in-time macro data for Chile as an open API + MCP server for agents. *TypeScript · MCP · Vercel.*
- **toka** — Offline-first household tasks: Go + PostgreSQL with row-level security, Android client. *Go · PostgreSQL · Android.*

SKILLS

Warehouses	BigQuery · ClickHouse · DuckDB · Snowflake · SAP HANA · Apache Iceberg · Delta
Orchestration	Dagster · Prefect · dbt · dlt · DolphinScheduler · Kafka
Languages	Python · Go · SQL · TypeScript · Node.js
Infra	GCP · Docker · GitHub Actions · CI/CD · Linux · Tailscale
AI / Agents	Claude Code · Agent Skills · MCP · Multi-agent orchestration · Claude Agent SDK (ACP) · LLMOps/observability
BI	Power BI · DAX · Deneb (Vega) · Plotly · D3.js

EDUCATION

Data Science Diploma & Music Composition B.A., PUC Chile · **BSc Data Science (in progress)**, IU International
